## REPORT OF SUPERINTENDENT OF SCHOOLS

---

To the School Board and Citizens of Sullivan :

I herein submit my fourth annual report as superintendent of schools.

One full year has passed since the end of combat in World War II. The end of the war has brought no relief to the deficiencies in the American public school system. The situation has become steadily more critical.

An appraisal of American schools reveals many inadequacies in personnel, facilities and services that are necessary to meet the needs of children and the welfare of the nation.

Teachers leaving the profession since 1939 have formed the greatest vocational exodus in history. In relation to their numbers the loss to the profession has been more acute in the elementary schools and the rural areas have suffered most. If the fully qualified teachers received more pay than laborers the public schools would be staffed more adequately throughout the entire country.

Adequate health facilities and programs are non-existent in a very large proportion of rural schools. Sound health is the most valuable individual and national asset. Every child should be given complete physical examinations periodically followed by corrective measures.

More opportunities should be offered in the schools to practice various duties of citizenship. The financial tribute exacted by crime is great. Less than two per cent of the population may be classed as criminal. The financial losses caused by this small per cent amounts to more than five times the sum spent annually for public education in the interest of all children.

The impact of these general shortages have made several problems more acute in the Sullivan schools. At the present time the East Sullivan school is over crowded and the possible

maintenance of two schools seems impractical. The school district should consider some plan of pupil classification with the welfare of the individual pupil as the determining factor. The pupils in grades seven and eight might be transferred to a school in another district in order to relieve the congestion. The problem of higher transportation costs and tuition must be anticipated as important factors in the decision. The migratory population in the Sullivan school makes it difficult to determine the best plan of organization prior to the school term. The decision by the voters concerning an adequate appropriation is based directly on the type of school organization for which the budget is adopted and the trend of school costs.

#### ENROLLMENT AND CLASSIFICATION

## **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES—IT PAYS!**

The prevention of forest fires is the most important and difficult part of the work of your forest fire warden who heads a local organization set up primarily for the security of your community's forest property. The importance and value of the work of the forest fire warden and his deputies is, perhaps, best appreciated during hazardous periods when fire danger is greatest. The public, however, looks to him at all times for speedy and economical suppression of going fires

To properly fulfill his mission, the warden needs the generous and understanding cooperation of the public at large. He attempts to secure this cooperation by the posting of caution notices, news items and by word of mouth, always carefully explaining the necessity of restrictions imposed. In the matter of giving cooperation, however, the public often fails. The record shows that an average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year. Analysis of fire causes reveal the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable.

The careless smoker fails to properly extinguish his cigar, cigarette or pipe ashes or thoughtlessly throws them from the car window; the debris burner fails or refuses to consult the warden, as the law requires when the ground is not covered with snow, before attempting to burn; campers fail to properly extinguish their fires or frequently build fires when conditions are unfavorable.

Remember these rules:

1. Use ordinary common sense with fire in and near woodland.
2. Comply with requirements on the use of fire in and near woodland and when the ground is not covered with snow, secure written permission to burn from the forest fire warden.
3. Be careful when smoking in or near woodlands. Don't throw lighted material from moving vehicles.
4. Cooperate with and assist the warden and urge others to do so.
5. **HELP YOUR FOREST FIRE WARDEN PREVENT FIRES—**his efforts are only as effective as is the cooperation you give him!

**F. J. BAKER,**  
District Fire Chief.
